FORD RANGER 2012

"The suspensions of recreational- and light commercial vehicles are often overloaded in regard to the specifications of the vehicle manufacturers. This over-stress has a negative influence on different security aspects: comfort, grip and road-holding. In order to improve the original suspension, Weweler-Colaert develops reinforcement kits for all kind of light commercial vehicles and trucks."

FORD RANGER 2012

Amongst the most high-tech in its segment, Ford Ranger is the impressive result of an all-new global compact pickup truck platform from Ford - the latest to emerge under the company's One Ford initiative - and Mazda.

The Ford Ranger is offered as a complete family of compact trucks - with three different cab body styles, 4x2 and 4x4 drivetrains, two ride heights and up to five series choices, depending on the market.
