FORD TRANSIT 2T 2014

"The suspensions of recreational- and light commercial vehicles are often overloaded in regard to the specifications of the vehicle manufacturers. This over-stress has a negative influence on different security aspects: comfort, grip and road-holding. In order to improve the original suspension, Weweler-Colaert develops reinforcement kits for all kind of light commercial vehicles and trucks."

FORD TRANSIT 2T 2014

The Transit 2T is the biggest Van in the Ford range. It is a commercial vehicle with a high load capacity suitable for the heavy job, but also for the transport of people. With a wide choice of wheelbases, cab-styles, roof-heights, engines and more, it provides an extensive cargo space. (4 Euro pallets for the standard range)

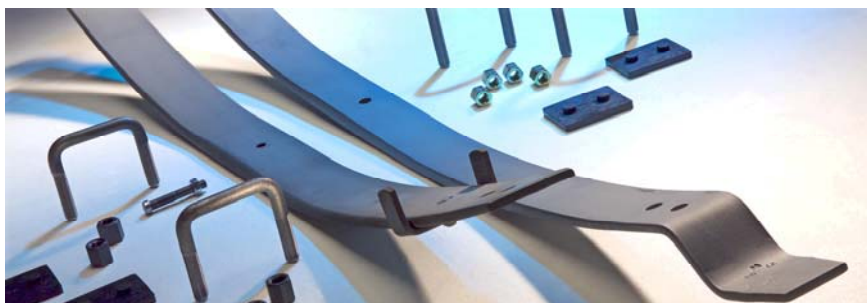

All mono leaf springs:

FK037T338ZB

All 2 & 3 leaf springs:

FK037T328ZB
